## **General information:**

Students are required to participate and try their best. All the classes I teach are elective classes. Each class is divided into a semester course with a specific name. 9<sup>th</sup> grade requires Swimming 1/personal fitness. Then the sequel of classes for water are swimming 2, water safety and lastly recreational activities. Every class will get certified in something; lifeguarding, WSI or SCUBA. Students need to be responsible and communicate with teachers. Medicals or Sick notes should be emailed from a parent/guardian email. Make ups for class will be determined based on what was missed that day. Generally every class period equals a class participation grade. There will be Homework grades and Skills test grades in addition. This should be a fun and easy grade booster as long as these guidelines are followed. Students should not leave class early or come late. They have 10-15 minutes to get changed in the beginning and end of the period. Students are to follow locker room rules at all times. Locks are sold on OSP and students picked up at the treasurer's office.
